Post-bushing insulator

Bushing insulator

Post insulator

BOPLAST LTD MANUFACTURER OF ELECTROTECHNICAL INSULATORS

BOPLAST LTD MANUFACTURER OF ELECTROTECHNICAL INSULATORS

is the Polish market leader in the production of insulation from cast epoxy resins since 1960. The manufactured products are used in devices and power equipments in the country and abroad. Boplast Sp. z o.o. also has mechanical workshop, which produced metal details in the technology of forming and mechanical processing. The quality of our products provide relevant certificats and test evidence and admissions. Since 1997 the plant has a certified Quality Management System according to ISO 9001.

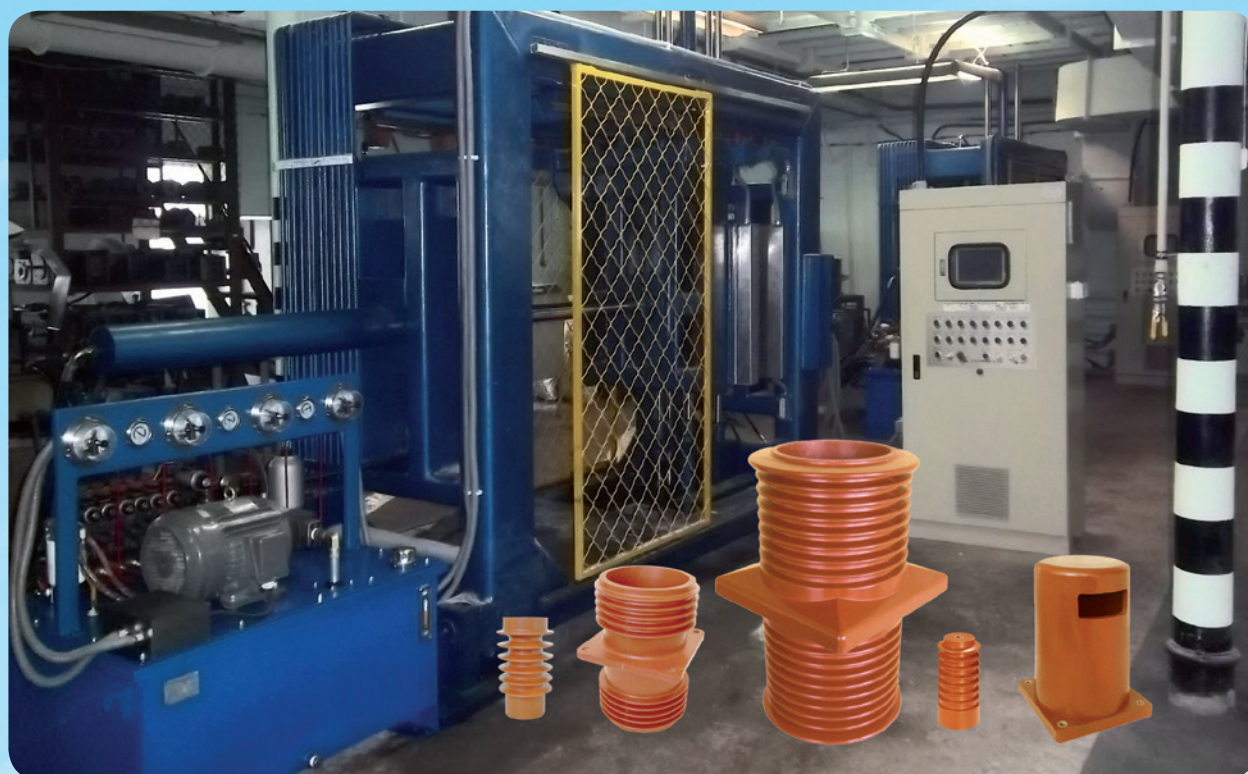

Certificates

At present we offer a wide range of products are including:

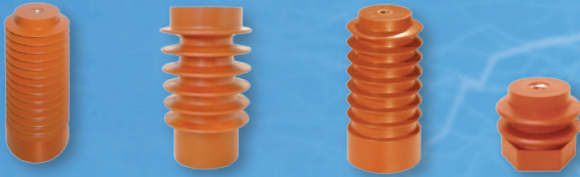

- post insulators from 0,2 kV to 42 kV
- post – capacitive insulators from 7,2 kV to 42 kV
- bushing insulators from 7,2 kV to 42 kV
- protective insulators from 7,2 kV to 42 kV
- special isolators
- voltage indicator and voltage indicator with interlock
- insulating elements from thermoplastic materials
- metal details for electrical apparatus and MV switchgears.

We have an ability to design and manufacture our products under the special requirements of the customer.

Leading products

Post insulators from 0,2kV to 42 kV

Post-capacitive insulators from 7,2 kV to 42 kV

Bushing insulators from 7,2 kV to 42 kV

Post-bushig insulators from 7,2 kV to 42 kV

Voltage indicator
WN1

Voltage indicator
with blockade WNS1

We provide services related to:

- metalworking (CNC lathes, milling machines),
- forging works (press machines from 40 to 160 ton),
- welding (MIG, aluminum, copper).

Why BOPLAST?

Boplast Sp. with o.o also deals with the provision of services related to metalworking, metal forming and welding. We specialize in producing the highest quality components for electrical apparatus and switchgears for energetics. Commissioned parts are made in conjunction with silvering, galvanizing zinc-plating, hot-dip galvanizing and powder coating. We specialize also in the production of components of the main contacts. We produce main parts

for the electric apparatus, driving elements and components for them. The company employs staff are experienced in production. The technology of the production, through the purchase of CNC machine tools, allowed a substantial increase in the quality of manufactured parts.

We invite you to cooperation, with the conviction that our many years of experience and qualification guarantees a reliable and competent service.

Awards and Distinctions

Business Gazelle 2015

THE 16th EDITION OF THE RATING MOST DYNAMIC SMALL AND MEDIUM-SIZED COMPANIES

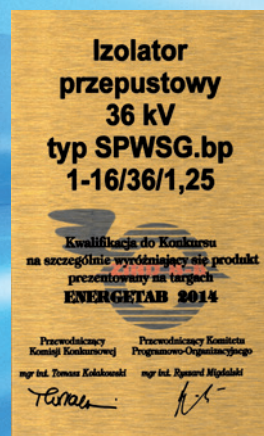

The journal „Puls Biznesu” confirms that company Boplast LTD Manufacturer of Electrotechnical Insulators is included in the elite club „Business Gazelle” the most dynamically developing companies.

Award in the rating of Forbes magazine

FORBES DIAMONDS 2015

in the category of companies with revenues between 5 and 50 million PLN in Pomerania region.

Qualification to the Competition for the most remarkable products presented at the ENERGETAB 2014 fair for Bushing insulator on voltage 36 kV type SPWSG. bp1-16/36/1,25
