Wide assortment

High quality product

Responsibility and cooperation

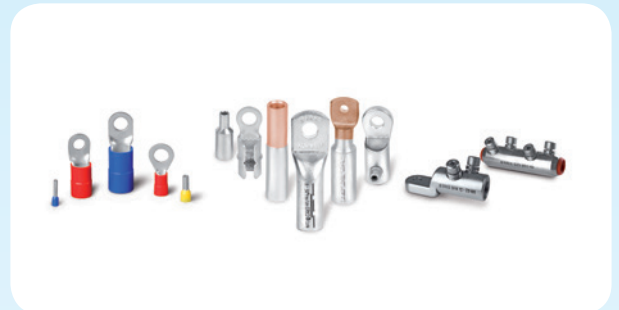

Products

We are one of the leading Polish producers of various types of cable terminals and connectors, as well as tools for electrical works. Our own engineering office, advanced technology of production and a modern and flexible fleet of machines enable us to react quickly to the individual customers' needs.

Main products groups

Cable terminals and connectors

ERKO range of products covers over 2000 types of cable terminals and connectors. We also offer design and production of custom made cable terminals and connectors made of aluminum, copper, aluminum-copper, stainless steel and brass.

Tools and accessories

We manufacture crimping, cutting, hole punching tools (mechanical, hydraulic, pneumatic) and other electricians tools and accessories.

Busbar processing

ERKO offers machines with functions of cutting, hole punching, bending, offsetting and inserting nuts in aluminum and copper busbars. Maximum dimensions of processed busbar are 15 x 200mm.

Shark technology

SHARK technology is dedicated to connect winding enameled wires in motors and oil transformers, copper and aluminum wires, round and rectangular wires.
