ELEKTRO-PLAST

– ELECTROTECHNICAL EQUIPMENT

The tradition of our business dates back to 1980 and presently we are one of the top domestic manufacturers of electrical installation equipment. Our manufacturing program includes plastic electrical installation accessories, such as surface and flush distribution boards, meter boards, a wide range of wire and cable grips, flush junction boxes, surface and flush - hermetic boxes and cable reels etc. We have a modern and continuously modernized machine park. We have our own design and engineering office (including tool rooms) internal warehouses and means of transport. Our company offers high quality products provided with appropriate attestations and certificates. We have implemented the quality management system ISO 9001:2008 TUV Rheinland.

Headcount increase, modernization of the existing and construction of new buildings help us to extend the scope of production and services. Our products can be recognized in majority of outlets of the electro-technical branch in Poland. We also export our products to many foreign markets for example: Russia, Lithuania, Latvia, Estonia, Belarus, Ukraine, the Czech Republic, Slovakia, Germany, Kazakhstan, Slovenia, Bulgaria, Romania, Serbia, Hungary and Iceland.

Experienced staff, in addition to a young and dynamic trade marketing team, provide strong foundation and guarantee constant development. Dynamic development of the company, the use of modern technologies and best sort of materials enable us to offer products which meet highest quality requirements and are characterized by modern design. Our products are highly appreciated in rankings and surveys organized by specialist magazines. Instant performance of orders, attractive conditions of cooperation, customer support are the advantages which help us gain customers' trust. We run our own web service containing the current pricing list, current product offers, current news and order department. We also run sales support program for our customers by means of attractive advertising and promotion campaigns, participation in domestic and foreign fair events, free of charge boards in outlets and publications in media.

It is the commitment of our staff, its engagement and gained abilities along with modern approach in production and distribution that let us achieve the highest level of offered products. We are open to your suggestions and comments. We encourage you to read the catalogue and cooperate with us.

Main products

The distribution boards are made of plastic. They are fit for indoor use. The distribution boards are equipped with a closed box casing and they are adaptable for sealing. The sides of casing have grooves for an easy introduction of wires or tubes. The distribution boards are equipped with describing labels and also with N+PE terminal strips. The TH 35/7,5 (Eurobus) bracket is an assembly element in the distribution board that allows fixing over - current protections, current variation breaker switchers as well as different electrical apparatuses...

Hermetic boxes are applied in all electric surface wirings where high protection degree is required. The Family of hermetic boxes is composed of many variations, the variations are composed of boxes in different sizes and different ways of inputting wires inside the box. Hermetic boxes characterize with an easy construction composed of casing and cover of box: version without weakening rings, version with weakening rings for glands, version with glands PE, version with membrane glands...

The box is destined for a casing for the control connector of a lightning protection system in the external elevations of the building, it can be mounted without removing the connector, thanks to the retractable parts. It protects the connector from the weather. The new lid of the box is made of stainless steel – INOX guarantee an aesthetic appearance and increasing the strength parameters...

The plastic boxes are made of plastic in grey color RAL 7035, equipped with rubber seal allowing to get high parameters of sealing, assembly plate, door in grey or transparent color made of PC (polycarbonate) with hinges, that might be closed with one or two locks with a key. Universal application and precisely made elements as a result gives solidly made and aesthetically looking plastic box...

The assembly grips are adjusted to fixing of electric, telecommunication and control wires as well as installation pipes to different surfaces. The use of the grips for wires ensures, but is not limited to the following: extremely fast assembly, reliability of fixing, professional appearance of installation, possibility of the grip release in order to adjust the installation, and relatively low cost of installation...

The universal cable reel is fit for rolling: electrical cables, ropes and garden hoses. There are five sizes of cable reels. The cable reels consist of solid metal stand made of galvanizing tube with profiled handle and with reel made of high quality plastic. In reel case there are chambers for mounting single - phase or three - phases electrical board sockets in all configurations according to individual user needs. The reels are also equipped with an installation canal ended with flexible gland for electrical cable between take up reel and socket chambers. Furthermore the chamber is equipped with cable blocking clamp who protects against pulling out and also the chamber is specially ribbed for easy mounting of the terminal boards...
