About Marmat

MARMAT company specializes in manufacturing electro products. For our customers we offer a wide range of products that are suitable for housing and industrial buildings. All the products are produced only by the original granule and our production lines secure the highest quality of the products. The products meet all the requirements (also EC). All the certificates and positive opinion from Polish Telecommunication and Power Industry are the testament to that.

The purpose of our company is to meet all the customers' demands. Due to that we take care not only of the best quality of the products but also of their aesthetical design. We hope that our offer meets everybody's expectations. Our company is developing businesslike and with dynamism.
