Manex Sp. z o.o.

MANEX company was established in Cracow, Poland in 1987 as a private-owned, limited liability company. At the beginning MANEX activities were carried out in one manufacturing plant – Cable Manufacturing Plant in Jaworzno – with only one own-design extruding line. Over the years MANEX has been substantially developed. In Jaworzno a new 700m² production hall and new office and social facilities were built in 1992-2005 with five modern, computer-controlled extruding lines. Also, by the end of 1997 an industrial plot of more than 10000 m² was bought in Skawina along with two buildings of the total area of 2700 m². Recently, in 2014 MANEX invested again in Skawina facilities with the new production hall and representative office facilities of the total area of 3300m². At present the company's production is carried out in two modern and high-tech production plants in Jaworzno and Skawina with the Head Office located since 1990 in Kraków. By the end of 2015 MANEX employed over 60 highly qualified and experienced employees.

CABLE MANUFACTURING PLANT IN JAWORZNO

Jaworzno Plant offers more than 300 types of single- and multi-conductor (single- or multi-core) cables and wires, in variety of colours, with PVC, PE, PP, TPE insulation and halogen-free conductors. 5 extruding lines ensure daily manufacturing capacity of 1000 km of electric wires of 0,14 mm² to 120 mm² in cross-section.

COPPER PROCESSING PLANT IN SKAWINA

The range of manufactured Cu wires and strips includes the diameters from 0,10 mm to 3,50 mm. 11 modern stranding machines allows to manufacture Cu and Al stranded wires within 0,14 mm² to 120 mm² in cross-section. The 4 existing single- and multiwire drawing lines

(including a M85 thick-wire drawing machine for drawing from 8 mm diameter copper rods) have the capability to manufacture ca 450 tons a month of bare Cu products.

MACHINE PRODUCTION PLANT IN SKAWINA

The plant offers designing, construction and production of machines, equipment, production lines and control systems for cable, automotive, medical and other industries. All projects can be prepared and performed according to the particular and individual specifications and requirements.

Main Products and Services

MANEX has been mainly specialized in production of cables for automotive and railway industries, however the range of production includes also a wide variety of power and electric cables and wires, such as earth and ground wires, reeling and feeding cables for submersible pumps, installation cables and wires for construction and power industries, telecommunication and IT as well as for household and electronic equipment and non-typical cables and wires manufactured according to the specifications and patterns delivered by customers.

- **Automotive cables**

Standard and non-typical single- and multiconductor cables, with single- or multicore conductors and various types of insulation, designed for LV installations in vehicles

- **Power cables**

Standard and non-typical single- and multiconductor cables, with single- or multicore conductors and various types of insulation, designed for fixed installation and in mobile and portable devices

- **Rolling stock cables**

Standard and non-typical power and control cables used in railway rolling stock with a specific resistance to fire, with halogen-free polyolefin blend insulation

- **Earth and ground wires**

Single conductor, multi-core cables, PVC or silicon rubber insulated used in portable earthing and bridging devices

- **Copper processing**

Cu and Al, bare single- or multicore conductors 0,13 – 0,150 mm², conductors for automotive cables, multi-wire Cu and Al strip

- **Machines and equipment**

Individual machines such, as extruders, pay-off units, capstans, cutters, stranding units, control systems etc. or complete production lines used in cable manufacturing and plastics processing

Why Manex?

- **MANEX** is a mid-size company and therefore can easily change and adjust its production lines to meet individual and specific requirements of its clients.
- **MANEX** can provide both, large and small quantities of its products as being flexible in performance of various orders to its clients.
- **MANEX** offers the high quality products by a reasonable price keeping in the same time all international and industrial standards and regulations.

- **MANEX** can provide professional advise and consultancy services in designing, production, testing, assembly and commissioning of machines, equipment as well as production lines for cable and wire manufacturing.
- **MANEX** is open for any kind of cooperation such as a direct supplier of its standard products, a sub-supplier of products ordered by its clients or being a partner in any joint ventures in electrical industry.

Prizes and Awards

MANEX has been awarded several times by Polish regional and national authorities with prestigious and recognized prizes and certificates such as Business Leader

Award, Business Fair Activity Prize, Malopolska Voivodship Business Quality Prize, Well-Managed Company Certificate and many others.
