# Quality policy

The goal of our company is continuous improvement of customer service and the quality of our products. In order to achieve it, we:

- deliver high-quality reliable products
- offer full assortment which meets the customer needs
- cooperate with our partners via a marketing network
- provide brochures, catalogues and updated website
- offer fast and comprehensive service
- set pricing policy based on individual client's needs
- offer technical advisory
- undertake bespoke orders
- carry out training courses for our customers

In the recent years, the Cooperative has introduced a number of actions to improve management, innovate technologies and products. A range of new products has entered the market. The Cooperative makes continuous efforts to ensure high quality and reliability of its products. In order to achieve this, quality management system acc. to PN-EN ISO 9001 has been implemented.

The quality management system and PCBC certificate proving the conformity with PN-EN ISO 9001 standard make the Cooperative's products the right choice. All products

have „B” safety sign and quality certificates from research institutes in Czech Republic, Ukraine, Belarus and Russia.

“SPAMEL” markets its products all over the country and also exports them. The sales network is one of the strongest aspects of its business activity. Products are offered on regular basis to ca. 150 wholesale partners. “SPAMEL” is in touch with all regular and potential customers and exhibits on electric and power industry trade fairs, in country and abroad. Customers are also given trainings on functionalities and use of the products.

# Our products

Spółdzielnia Inwalidów "SPAMEL" in Twardogóra was founded in 1950. The scope of this Cooperative is professional and social rehabilitation of the disabled people in a jointly managed enterprise, including electro-technical, electronic and chemistry products, trade: import and export, as well as providing services. The products of the Cooperative are used in electro-technical, machine and power generating industry as components for electrical, power and control devices. They are also used in building industry as elements for electrical installations. The main products of the Cooperative are low-voltage devices, including:

## Cam switches

## Disconnectors

## Control pushbuttons

## Emergency switches

## Combos

## Pendant control stations

# About SPAMEL

The products of SI "SPAMEL" are manufactured based on its own designs made in R&D department as well as designs obtained through co-operation with external research and

development institutes. The latest technologies are used in designing the products.
