# About company

**TIMEX® is a Polish company, active since 1983. Headquarters and factory in Szczecinek, Sales Office in Warsaw. Currently it is regarded as one of the largest Polish producers of electrical installation equipment mainly, series of switches and sockets; flush-mounted as surface-mounted (IP20 and IP44).**

An advantage in the context of operation development is a modern production hall with the machinery. Technological innovativeness and a broad range of production supported by certifications and patents constitute a perfect development base for TIMEX®. Innovativeness in combination with long-term experience are the strengths of the company and support ensuring possibly the shortest time for processing production orders.

International presence, TIMEX® cooperates with distributors and chain stores, among others in: Germany, Russia, Bulgaria, Czech Republic, Romania, USA, Norway, etc.

The strategy of TIMEX® is expansion on international markets with focus on the countries of Europe and Asia.

## Premium

The Premium series is the most modern achievement in a field of reliable electrical devices. Very resistant to damage and UV rays. Professional and modern mechanism satisfies even the most demanding architects. The products constitute in response to demand for comfort, security and communication.
