OUR STORY

GENERAL
INFORMATION

WE KNOW EVERYTHING

ABOUT WIRES

The VOLTRIM factory was founded in 2004. within the special economic zone in Zarnowiec, approx. 50 km from the ports in Gdynia and Gdańsk.

Initially only installation cables and flexible wires for mobile receivers were produced. Currently, VOLTRIM offers nearly 4,000 types of cables of various designs with copper and aluminum working cores as well as insulation and coating made of PVC, PE, XLPE or halogen-free materials.

OUR STORY

KEY DATES

2004

The factory starts to operate

After 9 months of construction, the factory starts production of installation wires and low voltage power cables. We receive certificates necessary to begin the production of basic articles for the domestic market.

2005

The beginning of export sales

Acquisition of the first European certificates on certain types of wires and cables allows the start-up of export sales. Voltrim makes its debut on the German market.

OUR STORY

2007 - 2011

The implementation of the Quality Policy allows the factory to optimize business processes and production efficiency. The offer is extended with shield cables and control cables made of HFFR plastic. Voltrim appears on the Swiss, Czech and Turkish markets.

Years of intensive development

2006

Obtaining the ISO 9001 certificate

In response to the growing production demand, Voltrim implements the European quality management standard ISO 9001. The implementation is sealed with a certificate issued through Lloyd's Register and a Quality Policy document.

KEY
DATES

KEY DATES

2012

The modernization of the machine park

The investment in new machines pays off the increase in the cost-time efficiency of production, product repeatability and broadens the spectrum of possibilities for further development of the offe with new products.

2013

Quality control and special orders

To meet the requirements of customers, the quality control department is expanded and the scope of research is increased. This allows you to safely start production of wires for special orders - with an unusual design and requirements. The first custom orders introduce the Voltrim brand to the Chinese market.

OUR STORY

OUR STORY

2017

Raising organizational standards

In the face of changes in ISO 9001: 2015, the Voltrim factory undergoes another audit, which results in obtaining a certificate of compliance with the latest version of the standard. The tests of performance of DoP products are introduced. In the same year, Voltrim makes its debut on the Austrian and Dutch markets.

2014 -
2016

Modernization of the production line

The market demand for various types of control cables inspires further changes both in the offered assortment and factory infrastructure. The production lines are adapted to the processing of HFFR plastics, the department of the drawing room is created. The offer is enriched with class-6 cables with copper core, PE, PU, TPU and high flex cables.

KEY DATES

2018

New projects

Voltrim focuses its research on further improving the safety and durability of its products. The wires are classified in the B2ca, Dca, CCa classes of flammability. Preparations are underway to launch the silicon insulation wire extrusion section and cables of category B flammability.

KEY
DATES

Future plans

- The development of the department of special orders for control cables
- Launch of the silicone insulating section of the wires and cables in the fire category B
